

# FUAD ABIOLA ADEBISI

ANALYTICS ENGINEER | Data Modelling | dbt | SQL | BigQuery | Snowflake | Business Intelligence

fuddiebiola@gmail.com | linkedin.com/in/FuadAdebisi | github.com/Fuddie | fuddie.github.io

## PROFESSIONAL SUMMARY

Analytics Engineer with 4+ years of experience building data models, transformation pipelines and reporting solutions used by product and business teams. Built 10+ data products processing datasets of about 200M rows and supported reporting across 10M+ customers. Experienced with dbt, SQL, BigQuery, DataForm, Snowflake, Looker and Power BI, with a strong focus on data quality, useful metrics and clear reporting.

## CAREER HIGHLIGHTS

| 10+           | ~200M          | 10M+                | 60+                |
|---------------|----------------|---------------------|--------------------|
| Data products | Rows processed | Customers supported | Colleagues trained |

| <b>Analytics Engineering</b>           | dbt, DataForm, SQL, data modelling, data transformation, data quality testing, metric definition |
| <b>Warehousing &amp; Databases</b>     | Google BigQuery, Snowflake, PostgreSQL, MySQL                                                    |
| <b>BI &amp; Reporting</b>              | Looker, Power BI, Google Looker Studio, Excel                                                    |
| <b>Programming &amp; Collaboration</b> | Python, stakeholder management, requirements gathering, mentoring                                |

## PROFESSIONAL EXPERIENCE

### BI Engineer

Kuda Bank, Lagos | Jan 2022 - May 2026

- Built and maintained 10+ data products using dbt, DataForm and BigQuery, transforming datasets of about 200M rows into clean, tested models used for analysis and reporting.
- Worked with Product and Business teams to define data models, KPIs and business metrics for tracking customer behaviour and product performance across 10M+ customers, supporting a 20% improvement in core KPIs.
- Built shared data models and automated reports used in Looker, Looker Studio and Power BI, giving teams consistent metrics for day-to-day reporting.
- Built reporting and analysis used by product teams to track performance, contributing to 15% growth in new customer acquisition.
- Trained 60+ colleagues on Looker, BigQuery, data modelling and data exploration, helping teams use data more confidently without depending on analysts for every question.
- Mentored 2 interns on data modelling, transformation and analytics engineering workflows; both later moved into full-time roles.

### Customer Support Analyst

Kuda Bank, Lagos | Sep 2020 - Jan 2022

- Analysed customer service data and market trends to identify improvement opportunities for a 50+ person operations team.
- Worked with the Growth team on customer incentive strategies supporting engagement initiatives across 5M+ customers.
- Trained employees on new processes and Intercom, helping improve service delivery efficiency by 25%.

### Data QA Analyst

MDC-Africa, Lagos | Aug 2019 - May 2020

- Validated 1,000+ records daily, checking accuracy, completeness and compliance with client data standards.
- Analysed field activity and territory adherence across 16 regions in Ghana, identifying issues and reporting them for follow-up.
- Produced daily performance reports showing coverage gaps, underperformance and areas that needed attention.

## Data Analyst

NTA Star TV Network, Lagos | May 2018 - Aug 2019

- Analysed sales reports from 100+ agents across Nigeria, identifying trends that helped improve performance metrics by 15%.
- Verified sales data for 500+ reactivated dormant accounts to improve reporting accuracy and support business decisions.
- Monitored agent performance across 6 regions and supported salary and bonus calculations based on performance.

## SELECTED ANALYTICS ENGINEERING PROJECTS

|                                  |                                                                                                                                                                             |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>WalletFlow Analytics</b>      | Synthetic digital wallet analytics using dbt and BigQuery. Incremental MERGE processing, late-arriving data handling, DAU/MAU, retention, testing and CI.                   |
| <b>CareFlow Health Analytics</b> | Synthetic healthcare operations analytics covering appointments, encounters, admissions, wait time, readmissions, bed occupancy and business-rule testing.                  |
| <b>Olist Analytics</b>           | Public e-commerce pipeline using Snowflake and dbt Cloud with dimensional facts, ingestion watermarks, DEV/PROD isolation, CI, RBAC and scheduled production orchestration. |

## EDUCATION

|                                               |                                   |
|-----------------------------------------------|-----------------------------------|
| <b>Postgraduate Diploma, Computer Science</b> | University of Lagos   2018 - 2020 |
| <b>B.Sc., Physics Education</b>               | University of Lagos   2009 - 2015 |
